

# Powww

Pocket WiFi World Wide

## 1 WiFi icon

Flashes during start-up, which may take a few minutes last. Lights continuously when the device is ready for use

## 2 Network icon

Lights when the on / off button is pressed for 1 second to indicate the network strength (the 4 LED lights below).

## 3 Battery icon

Flashes when it becomes empty or is. A full battery can last approximately 13 hours. Charging an empty battery takes approximately 3 hours.

## 4 Signal strength

Indicates strength of battery and network, see point 6 (press on / off button for 1 second).

## 5 Charge connector

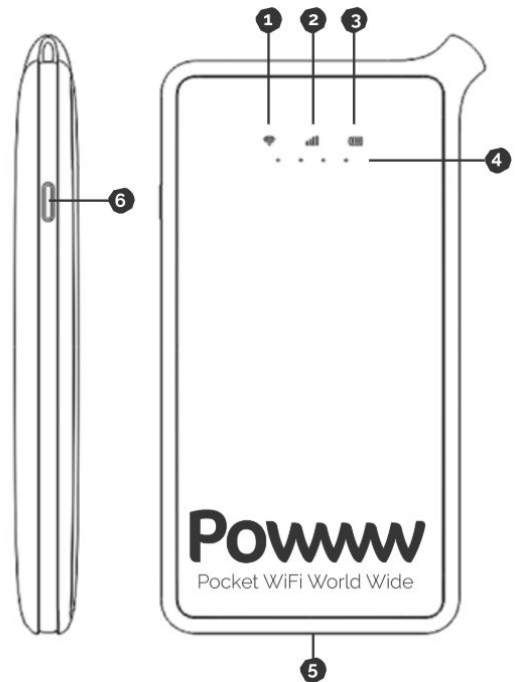

Plug the supplied USB cable in here, the other side in a USB charger (not included).

## 6 On/Off button

3 sec to turn on.

1 sec first to see the battery strength, then the signal strength of the 3G / 4G network follows.

5 sec to turn off.

## Instructions for using the Powww WiFi hotspot:

On the back of the device is the WiFi network name (WiFi\_xxxxx) and the password. Connect to your mobile device as soon as the device is ready (WiFi icon lit).

A maximum of 5 devices can be connected.

Connect a mobile device and type in the web browser; **192.168.43.1**.

You will then see how much data and time you have left (with a data bundle) and with a daily bundle you can see how much data you have already used.

Data saving tips: <https://www.powww.eu/data-usage-tips>

Extra data needed or with questions, please send an email to: [support@powww.eu](mailto:support@powww.eu)

Take a USB charger with you on a journey where the charging cable can.

## Safe trip!
